LIST OF CONTENTS

NUMBER 1

	iii	Editorial
A. Ibrahimbegović and **S. Mamouri**	1	Nonlinear dynamics of flexible beams in planar motion: formulation and time-stepping scheme for stiff problems
R. de Borst and **A. E. Groen**	23	Towards efficient and robust elements for 3D-soil plasticity
D. Barlam and **E. Zahavi**	35	The reliability of solutions in contact problems
I. Kosaka and **C. C. Swan**	47	A symmetry reduction method for continuum structural topology optimization
G. C. Archer, G. Fenves and **C. Thewalt**	63	A new object-oriented finite element analysis program architecture
G. Fabbrocino, G. Manfredi and **E. Cosenza**	77	Non-linear analysis of composite beams under positive bending
K. Abdel-Tawab and **A. K. Noor**	91	A fuzzy-set analysis for a dynamic thermo-elasto-viscoplastic damage response
R. Barboni, A. Mannini and **P. Gaudenzi**	109	On the use of the P–TFE method for panel flutter optimization
X. Liu and **J. Onoda**	119	Controller design for vibration suppression of slewing flexible structures
	I	Calendar
	III	Call for Papers

NUMBER 2

H. Takabatake and **Y. Nagareda**	129	A simplified analysis of elastic plates with edge beams
W. Szyszkowski and **M. Hoetzel**	141	Optimal linear regulator problems solved by the finite element method
P. Harikrishna, J. Shanmugasundaram, S. Gomathinayagam and **N. Lakshmanan**	149	Analytical and experimental studies on the gust response of a 52 m tall steel lattice tower under wind loading
L. Young-Shin and **K. Young-Wann**	161	Nonlinear free vibration analysis of rotating hybrid cylindrical shells

J. F. Davalos and **P. Qiao**	169	A computational approach for analysis and optimal design of FRP beams
M. J. Terro, M. S. Mahmoud and **M. Abdel-Rohman**	185	Multi-loop feedback control of offshore steel jacket platforms
K. C. Ho and **K. T. Chau**	203	A finite strip loaded by a bonded-rivet of a different material
R. Kiviluoma	219	Coupled-mode buffeting and flutter analysis of bridges
P. Mahajan and **A. Dutta**	229	Adaptive computation of impact force under low velocity impact
S. H. Zhang, K. B. Nielsen, J. Danckert and **Z. R. Wang**	243	Numerical simulation of the integral hydro-bulge forming of non-clearance double-layer spherical vessels: deformation analysis
	I	Calendar
	III	Call for Papers

NUMBER 3

H. Askes, A. Rodríguez-Ferran and **A. Huerta**	257	Adaptive analysis of yield line patterns in plates with the arbitrary Lagrangian–Eulerian method
J. J. Zhang, I. I. Esat and **Y. H. Shi**	273	Load analysis with varying mesh stiffness
P. Bakshi and **P. C. Pandey**	281	Analytical shape sensitivity computation using hybrid finite elements
M. Gürgöze	299	Mechanical systems with a single viscous damper subject to a constraint equation
W. Glabisz	305	Vibration and stability of a beam with elastic supports and concentrated masses under conservative and nonconservative forces
A. Kaveh and **A. Davaran**	315	Spectral bisection of adaptive finite element meshes for parallel processing
K. Al-Hosani, S. Fadhil and **A. El-Zafrany**	325	Fundamental solution and boundary element analysis of thick plates on Winkler foundation
M. Walker	337	Optimal design of symmetric laminates with cut-outs for maximum buckling load
J. Q. Fang, Q. S. Li and **A. P. Jeary**	345	A new function transform technique for the solution of FEM dynamic equations

Xiaoguang Zheng and **Xiwu Xu** 357 Stress analysis of finite composite laminates with elliptical inclusion

R. Ramasamy and **N. Ganesan** 363 Vibration and damping analysis of fluid filled orthotropic cylindrical shells with constrained viscoelastic damping

I Calendar

III Call for Papers

NUMBER 4

A. Watson, D. Kennedy and **F. W. Williams** 377 Design of structures by a splitting method

P. C. Pandey, H. Shankaragouda and **A. Kr. Singh** 387 Nonlinear analysis of adhesively bonded lap joints considering viscoplasticity in adhesives

A. R. Krishna Reddy and **R. Palaninathan** 415 Free vibration of skew laminates

R. S. Bhatia and **G. S. Sekhon** 425 Generation of exact stiffness matrix for a conical shell element

J. Wang, P. C. Y. Lee and **D. H. Bailey** 437 Thickness-shear and flexural vibrations of linearly contoured crystal strips with multiprecision computation

X. Wang, Z. Feng and **L. J. Forney** 447 Computational simulation of turbulent mixing with mass transfer

X. Wang 467 Numerical analysis of moving orthotropic thin plates

I Calendar

III Call for Papers

IV Announcement

NUMBER 5

L. Holzleitner and **K. G. Mahmoud** 487 Structural shape optimization using MSC/NASTRAN and sequential quadratic programming

Y. F. Rashed, M. H. Aliabadi and **C. A. Brebbia** 515 A boundary element formulation for a Reissner plate on a Pasternak foundation

Z. M. Wang, A. K. H. Kwan and **H. C. Chan** 533 Mesoscopic study of concrete I: generation of random aggregate structure and finite element mesh

A. K. H. Kwan, Z. M. Wang and **H. C. Chan**	545	Mesoscopic study of concrete II: nonlinear finite element analysis
L. Zhang, J. W. Zu and **Z. Zheng**	557	The stochastic Newmark algorithm for random analysis of multi-degree-of-freedom nonlinear systems
X. Song and **J. D. Baldwin**	569	A novel node-based structural shape optimization algorithm
S. Pitt, R. Jones and **S. N. Atluri**	583	Further studies into interacting 3D cracks
	I	Calendar
	III	Call for Papers
	IV	Announcement

NUMBER 6

Y. G. Zhang and **B. Tabarrok**	599	Generation of surfaces via equilibrium of forces
S. Moradi and **F. Taheri**	615	Application of differential quadrature method to the delamination buckling of composite plates
H.-J. Jung, M.-C. Kim and **I.-W. Lee**	625	An improved subspace iteration method with shifting
S. Botello, E. Oñate and **J. M. Canet**	635	A layer-wise triangle for analysis of laminated composite plates and shells
J. A. Zapfe and **G. A. Lesieutre**	647	A discrete layer beam finite element for the dynamic analysis of composite sandwich beams with integral damping layers
A. Kaveh, A. Bahreininejad and **H. Mostafaei**	667	A hybrid graph–neural method for domain decomposition
M. Maalej, A. Karasaridis, D. Hatzinakos and **S. J. Pantazopoulou**	675	Spectral analysis of sensor data in civil engineering structures
L. D. Flippen Jr	691	Initial-interval driven biasing of nodal concentration along a fixed curve
	I	Calendar
	III	List of contents and author index for Volume 70, 1999
